Please see the below confirmation that we are NOT required to install sprinklers because of the new ski locker design. Attached is the attachment that I sent him.

Thank you,

This installation of partially enclosed ski racks in the halls will not require the installation of sprinklers.

Hi Rebecca

Are these lockers only for skis?

Subject: Smugglers Notch Inquiry

Hi Paul,

My name is Rebecca Tisbert, I work in Corporate Development up here at Smugglers' Notch Resort with Jason Hall and Vicky Vautour. I am currently working on a project where we will be replacing some existing ski lockers. There has been some concern with the Home Owners that I am working for about

Sprinklers. There are currently NO sprinklers in the buildings common area, where the ski lockers are currently located. The design that we have proposed, takes the fully open ski lockers and adds a door in order to lock them. The door would not be a full door, however there is still some concern. Could you clarify whether or not we would be required to install sprinklers for this change? I've attached some simple hand sketches to better explain the situation. Please don't hesitate to call me with any additional questions.

Thank you,

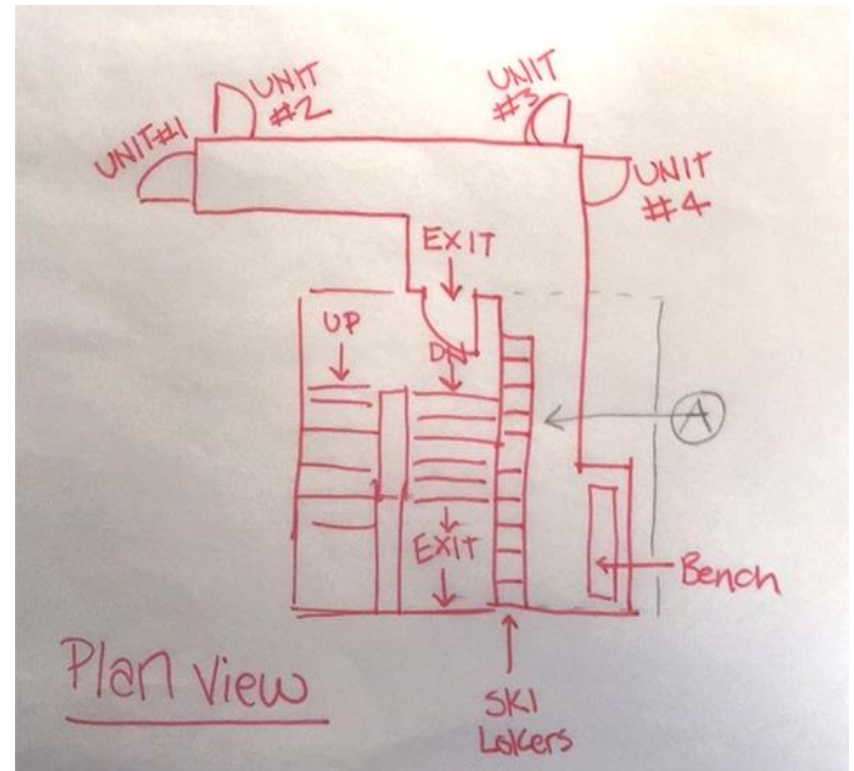

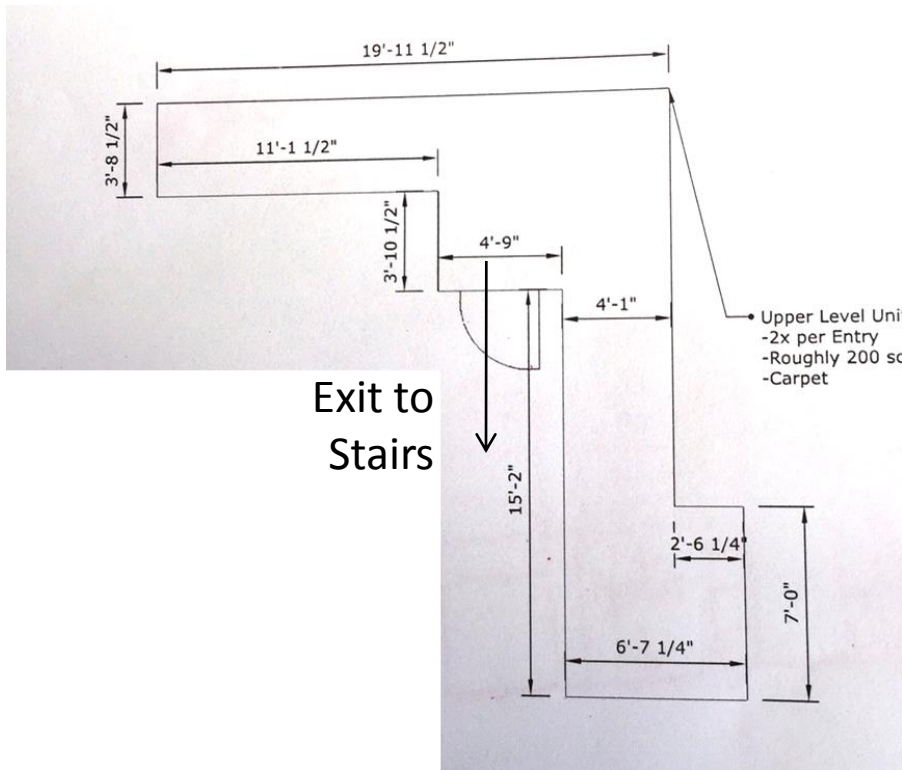

Becky Tisbert
